

Cure Eczema Slowly

Eliminating Eczema Step by Step (Est. 2013)

About Harrison Li

Photo: TEDx Speaker 2018

Harrison Li is an aspiring Registered Dietitian (RD) currently pursuing the Food & Nutritional Science programme in The University of Hong Kong (HKU). Apart from academic theory, he engages in real-life applications of using food as medicine. His notable achievements include helping eczema patients recover through *CureEczemaSlowly.com* since 2013, and publishing *The Eczema Manual: The Missing Compendium in Diagnosing, Treating, and Reversing Eczema* in 2017. His work has since reached 0.8 million people across 210+ countries.

Harrison is a Contributor to AtopicDermatitis.net. His work has been featured in [Faculty of Science, HKU](http://FacultyofScience.HKU), and [Wen Wei Po](http://WenWeiPo). Harrison has also written guest posts for [Itchy Little World](http://ItchyLittleWorld), [Amazing and Atopic](http://AmazingandAtopic), ScratchMeNot, and [Bamboo Bubby](http://BambooBubby).

About CureEczemaSlowly.com

As a typical eczema patient since the early age of six, Harrison had gone through the waves and storms of steroid therapy, Chinese herbal medicine, numerous general physicians, dermatologists, and to no avail, in recovering from eczema. Until ten years later, he discovered the possibility of using an integrated evidence-based approach by applying nutrition and lifestyle strategies to reverse autoimmunity. Since 2013, he has embarked on an mission to eliminate eczema worldwide.

Cure Eczema Slowly is a non-profit organization established to help toddlers, children, adolescents, adults, and elderly to eliminate eczema step by step, through science and experience. Any partnership in synergy with this mission is welcome.

Further patient advocacy can be found on YouTube and Slideshare.
